

# **SEFS - Fundamentals of Systems Engineering (Fall 2018)**

**Prof. Aurelie Aurilla Arntzen  
Prof. Alberto Sols**

**Systems Engineering Program  
Department of Science and Industry Systems  
Faculty of Technology, Natural Sciences and Maritime Sciences**

# Exercise # 6

- **Work in Teams to identify the system requirements for the selected design concept.**
- **Identify for each system requirement the appropriate verification methods (which may differ from one life-cycle phase to the next).**
- **Trace stakeholders to the stakeholder requirements, these to the system requirements, and the system requirements to their verification methods.**
- **Give a presentation on your system requirements and their verification methods.**
